Email Marketing.....

.....the most effective message delivery option available. Our service places your message directly on the desks of the target audience.

It's all about getting the recipient to open the message in their inbox. We develop all our emails in html code with the proper amounts of text to image, assuring optimum deliverability, and "pre-display" appearance.

Our database is made up of industry specific contacts, all with interest in machinery, services, consumables, auctions, trade shows and more. Drive prospects to your website and other online marketing materials with Printers' Marketplace Email Marketing.

Email blasts include:

- HTML coded document
- Web version landing page
- Message tracking
- Analytic follow-up report

Price: Single Email Blast* \$1,700.00

Custom graphic design work available.....\$78.00/hr

* Discounted quarterly, monthly, weekly email campaign plans available upon request.

eMag by Printers' Marketplace.....

.....a monthly online magazine devoted to the printing industry. With a simple and intuitive interface, eMag by Printers' Marketplace draws in readers and encourages them to engage with your content. Users can customize their experience in ways that add value to the online experience. Features like High Quality Text & Zoom, Pan & Scroll, Hyperlinks, Advanced Search, Page Printing, Audio, Video, and Flash keep the reader in the moment.

Editions are closed to ad sales near the end of every month. An E-Blast at the beginning of every month announces your products to the industry.

eMag by Printers' Marketplace Page Specifications

PDF Requirements:

Image Resolution -Have minimum resolution of 300 DPI.

Fonts and Transparency -Contain embedded fonts and flattened transparencies.

Printer Marks and Page Bleed -**DO NOT** include bleed, gutter, or crop marks. (What you see on your PDF is what your digital edition will look like.)

Reader Spreads -Contain individual pages, **NOT** cover layouts or other reader spreads.

Masked Text -**HAVE NO** masked text. Hidden layers will be brought to the top layer during the vector conversion process. Please remove all masked text in your document if you would like to use the vector converter.

Selectable Text -In order for our system to search the issue, we must be able to select, copy & paste the text. If you use text outlines or raster images and you can not select, copy & paste the text then your issue will not be searchable. Also, private use Unicode characters will not be searchable.

CMYK Colorspace-Use RGB colorspace. Using CMYK is supported but CMYK colors must be converted to RGB colors to display in a digital edition. Depending on your color profile, some colors transitioned from CMYK to RGB may come through as washed out or not as true as you might like. Using RGB colorspace obviates the need for color conversion and can result in truer colors in the resulting digital edition.

Video:

Must be uploaded as a FLV video format

Audio:

Must be uploaded as a MP3 audio format

Flash Animation:

Supply animation as Flash 6 files. We will need .swf and .fla files supplied. These .swf and .fla files must be smaller than the standard page dimensions of the converted publication. These dimensions will vary based on the selected resolution.

Make sure there is no white space around the edge of the flash animation. Use a transparent background to define the correct area of the animation.

Set the flash file to a frame of 30 fps

For animations that shouldn't loop, please "action script" it as such.

Any action script used in the animations cannot use the root reference. It must instead use parent references.

There is no file size limit on animations, but for loading purposes the files should be as small as possible.

Images should be set to lossless compression instead of photo compression.

Social Media.....

.....Social networks are constantly evolving. Social media today isn't just about sharing photos and status updates. It has become a cost effective marketing tool for businesses to reach a large number of people with their message. Social Media is the quickest way to enhance personal branding. It allows you to stay connected to your customers and build new customers at the same time. By using Social Media you can bring high traffic to your site in two ways. Primary traffic, where you get direct visitors from your social networking sites as well as secondary traffic, which is indirect referral traffic from websites which you are linked to and send you visitors. Who doesn't want to drive more traffic to their website?

We focus on four main avenues of Social Networking:

- Twitter
- Facebook
- LinkedIn
- The Printers' Marketplace Daily

Email Campaigns, Client Retentions, Banner Ads and Sidebar Ads all get free mention via our Social Networks.

Do you feel lost in this world of Social Media? Give us a call and we can help you build a Social Media empire for your business!
